October 25, 2005

REMARKS

The specification, claims and abstract have been amended so as to correct the units expression for melt index. No question of "new matter" has been raised by such revisions since it is notoriously well known via ASTM D-1238 that the units for melt index is "g/10min" and since the Tables in the originally filed specification have the correct units for the melt indices stated therein.

An early and favorable action on the merits is awaited.

Respectfully submitted,

NIXON & VANDERHYE P.C.
